

Paper Low Relief

Description of Technique

1. Make a frame out of thick cardboard, foam board or wood.
2. Determine the size and dimensions of the frame.
3. Cut strips of paper and/or cardboard of various lengths.
4. To create the basic forms, role the strips around a rigid cylinder such as pencil, a marker or a glue stick. The diameter of a cylinder should match the thickness of the paper strips.
5. Create different patterns and assemble them inside the frame to create figurative or decorative patterns.
