

# 3D Futuristic City

## Description of Technique

It is recommended that you make tests on scratch paper in order to understand the process well.

1. Fold the coloured Mayfair cardboard in half.
2. Starting on the fold, draw two parallel segments of the same length. Cut.
3. Unfold the cardboard and bend the creases inward to create a ladder effect.
4. Draw and cut other pairs of segments while varying distance and length of the slits.
5. Each new angle can be cut and folded in to create a ladder.
6. Glue the structure on the inside of the black cardboard already folded in half.
7. Create ladder by folding the cardboard at each slit.
