

# Personnalized Bar Code

## Description of Technique

1. On a sheet of paper placed horizontally, draw a triangle using a pencil and ruler.
2. Mark 6 or 7 reference points at regular intervals. E.g.: 2cm, 5cm, 7cm, 8cm, 11cm and 14cm.
3. Reproduce the reference points at the bottom of the page, and draw vertical and parallel lines using the reference points.
4. Place a rule alongside a vertical line and draw another vertical line using the opposite edge of the ruler.
5. Repeat steps for each vertical line.
6. On another sheet of paper, draw a pattern of your choice and transfer the drawing inside the rectangle made by the vertical lines.
7. With a black marker, colour in a vertical strip at regular intervals, and do the same for the rectangle except for the inside portion of your pattern.
8. Inside the pattern, alternate between black and white but in reverse order.

Materials	BB Product Code
Cartridge paper 22, 8x30, 5cm 120gm	1352806
