

Reflection Printing

Description of Technique

1. Draw and engrave an architectural pattern (house, building, business, school, etc.) on a scratch-foam printing plate.
2. Cut out the pattern.
3. With a pencil, draw a horizontal line across the centre of a sheet of paper or cardboard. (Adult)
4. Ink the plate with printing ink.
5. Place the engraved pattern on the centre line in the top part of the plate.
6. Place a sheet of newspaper on top, press and rub firmly on the engraved printing plate.
7. Now place the same pattern underneath the first one on the centre line to create a mirror image effect.
8. Repeat these steps with other patterns in order to create an interesting assortment of patterns.

Materials	BB Product Code
Scratch-foam printing plate, pack of 12	1203967
Printing ink, 150 ml tubes, White	1270610
Printing ink, 150 ml tubes, Cyan	1270602
