

Textures and Hues in Tempera

Description of Technique

1. Place a sheet of cartridge paper horizontally in front of you.
2. Using a small tube or a small spoon, apply liquid tempera in alternating colors along one edge of the page (either the left or bottom).
3. Using a piece of stiff cardboard, slide the paint from bottom to top or from left to right.
4. Keep on doing this while using cardboard strips of varying widths until the whole surface of the page is covered.
5. Let dry.
6. Draw a pattern with a black marker.
7. Cut out and glue on a sheet of construction paper.

Note: We suggest that you use any two colors along with white tempera.

Materials

Cartridge paper, 23 x 30 cm
