

Painting with Marbles

Description of Technique

1. Cut a cardboard box making sure the sides are approximately 15 cm high.
2. Put a sheet of cardboard at the bottom of the box. Cut out one or more stencils using cartridge paper and attach the stencils to the cardboard with adhesive gum.
3. Place a few marbles inside 3 jars, pour a small amount of different coloured liquid tempera in each jar, then shake the jars so that the marbles are well coated in the tempera.
4. Drop the coated marbles inside the box and make them roll around in all directions by shaking the box.
5. Let dry then remove the stencils.
