

Silhouette Tree

Description of Technique

1. Using the liquid tempera, paint a landscape on the white paper.
2. Let dry.
3. On the back of the painting, draw the outline of a tree with branches reaching out to the edge of the page.
4. Number each section separated by the branches.
5. Cut the piece of paper along the tree outline to remove the spaces inside of the branches.
6. By following the numbering system, glue each section onto the black cardboard one by one while leaving a space between each section.

The black cardboard must be larger than the sheet of white paper or cardboard.

Materials	BB Product Code
Cartridge paper , 120g/m ² , 30x45cm, pack of 100	1352814
