

Frosted Garden

Description of Technique

1. Apply a generous amount of different coloured block tempera on a sheet of cartridge paper. Choose rich, vivid colours. Add lots of water and apply the colours with a brush.
2. Make sure to colour the entire surface of the page.
3. Cut a piece of plastic film (such as Saran wrap) slightly larger than the sheet of paper.
4. Place the plastic film over the coloured and dampened paper while wrinkling it randomly.
5. Let dry at least 20 minutes.
6. Remove the plastic film and admire the textured effect you've created!
