

Giant Bugs

Description of Technique

1. Draw an insect on a sheet of cartridge paper.
2. Draw a line down the middle of the insect (through the axis of symmetry).
3. Cut the sheet of paper in half with the scissors.
4. Keep the right half of the drawing and fix it on a support of your choice with adhesive tape.
5. Unfold the protective pocket and place it over the drawing so that the fold is lined up with the cut in the paper.
6. Fix the right part on the support with adhesive tape.
7. On the pocket paint the insect with tempera.
8. Fold the left part of the pocket over the fresh tempera and rub gently.
9. Unfold the pocket and place a sheet of black construction paper over the painting.
10. Remove the sheet of paper.

Materials	BB Product Code
Miracolor tempera 500ml, white	1254861
